TECHNICIAN OUTREACH LEADS NASTF TO VISION 2013

New Orleans, LA — The National Automotive Service Task Force (NASTF), in an outreach to meet professional technicians, will hold their Spring 2013 General Meeting and Board Meeting at the 2013 VISION HiTech Training & Expo. With an audience of over 3,000 automotive service professionals, VISION serves as the perfect venue for NASTF to reach their targeted audience.

“Professional technicians take their technical skills very seriously,” notes Ron Pyle, President of the Automotive Service Association and Chairman of NASTF. “The Automotive Service Association is proud of our Missouri-Kansas affiliate for the international acclaim they have earned for their annual VISION HiTech Training & Expo event and very glad NASTF can be part of it.”

The 2013 VISION event will feature over 85 management and technical training courses designed for shop owners, managers, technicians and educators. Technical training courses include a selection of live-car and hands-on sessions, which are taught by some of the industry’s leading instructors. A wide selection of management sessions have been designed to offer something during each session for the shop owner, manager and service advisor. The 2013 VISION lineup will be announced in late October 2012. Early registration is encouraged.

The dates for the 21st Annual VISION Hi-Tech Training are March 7-10, 2013 at the Overland Park Convention Center and Sheraton Hotel located in the Kansas City metropolitan area. VISION also offers a 60,000 square foot exhibit hall featuring the latest in tools, equipment and services. More detailed information about VISION can be found at www.visionkc.com.
